PROJECT TITLE: TA-3 Miniature Transmitter

PROJECT NUMBER: 2514-4 NOMENCLATURE _____ PRIORITY Routine

EST. STARTING DATE _____ DATE REQUIRED Not specified

CLASSIFICATION/QUANTITY: EQUIPMENT -- / 4 REPORT -- / --

SOURCE OF REQUEST: O&T - Memo: O&T 58-804 DATE REC'D. 12 Sept. 1958

AUTHORITY: Chief, R&D LIAISON CONTACT: --

RESPONSIBILITY: UNIT Design ENGINEER _____

PROJECT DESCRIPTION:

This project, essentially is a continuation of the original TA-1 Project. The task at hand, in this case, is to extend the upper range of the TA-1A. The unit, which will be known as the TA-3, should have the same mode capability as the TA-1 and retain the same basic electrical and mechanical configuration of that unit, if at all possible. In addition, the TA-3 should be able to accept the modulator unit originally developed for use with the TA-1, if this is feasible and/or practical.

When developmental work is completed, four identical prototypes are to be built and delivered to OC-TTT for operational evaluation.

Distribution: Design (2) ✓
Mechanical Fabrication
Electrical Fabrication
